TECHNOLOGY AND APPLICATIONS OF ION BEAMS
Conference of The Atomic Collisions in Solids Group
of The Institute of Physics
7–10 April 1992, Loughborough University of Technology, UK

AUTHORS		ARTICLES
A Webb	**165**	Introduction
J S C McKee and M S Mathur	**167**	Laboratory based space experiments using an ion implanter
D Panknin, E Wieser, K Wollschläger, R Grötzschel and W Skorupa	**171**	Investigation of ion beam synthesized $FeSi_2$ and the $\alpha \rightarrow \beta$–phase transformation
M B H Breese, G W Grime, F Watt and R J Blaikie	**175**	Advances of nuclear microscopy in microelectronics analysis
F E Cecil, H Liu and J S Yan	**181**	Recent measurements of nuclear reaction cross-sections with ion beams at very low energies
W H Schulte, H Ebbing, H W Becker, M Berheide, M Buschmann, C Angulo, C Rolfs, G Amsel, I Trimaille, G Battistig, G E Mitchell and J S Schweitzer	**185**	High resolution depth profiling in near-surface regions of solids by narrow nuclear reaction resonances below 0.5 MeV with low energy spread proton beams

R P Howson, H A Ja'fer and A G Spencer	**191**	Reactive ion-plating at low ion energies with an unbalanced magnetron
A M Barklund, S Berg, I V Katardjiev, C Nender and P Carlsson	**197**	Ion-assisted selective deposition of aluminium for via-hole interconnections
J Ishikawa, H Tsuji, Y Okada, M Shinoda and Y Gotoh	**203**	Radio frequency plasma sputter type heavy negative ion source
I Neshev, R G Vichev, S Tzanev and S S Todorov	**209**	Sputtering of NiTi alloys: a comparison of experiment and simulation
A M Ektessabi, S Sato, H Kitamura and Y Masaki	**213**	Simulation of ion beam assisted deposition—a comparison with experimental results
J K Y Wong, J A Kilner, A B Danilin, I V Charniy and L A Charniy	**219**	The anomalous depth distribution of low dose oxygen and nitrogen ions implanted into silicon
A Chew and D E Sykes	**223**	SIMS analysis using molecular ions for the study of boron precipitation in silicon
G W Hall, R P Howson and A Chew	**227**	Reactive unbalanced magnetron sputtering of hydrogenated amorphous silicon and silicon oxide
R van Roijen and C W T Bulle-Lieuwma	**231**	Damage caused by Cl_2 based dry etching of III–V materials
V J Law, G A C Jones, D A Ritchie and M Tewordt	**233**	Chloromethane-based reactive ion etching of III–V semiconductor materials
R B Jackman	**239**	Ion beam-assisted etching of semiconductors: surface chemistry vs surface physics
D A O Hope, G J Monnington, S S Gill, N Borsing, J A Smith and J A Rees	**245**	Ion energy distributions in $SiCl_4$ and Ar/O_2 dry etching discharges
D Marshall and R B Jackman	**249**	Novel precursors for chemically assisted ion beam etching: reactions of dichloroethane on GaAs(100)
J Beckman and R B Jackman	**257**	Chemical etching of GaAs with a novel low energy ion beam source: a low damage process for device fabrication
H F Sahafi, G F Goldspink, A P Webb and M A Carter	**263**	Effect of flow rate on reactive ion etching of GaAs in CH_4/H_2 plasma
P D Townsend	**267**	Waveguide lasers in insulators using ion implantation
P Hoffmann and F Heinrich	**271**	Fragmentational collisions in reactive ion beam processing
F Heinrich and P Hoffmann	**275**	Analysis and control of ion beam processing by optical spectroscopy
M J Rodman, P J Chandler, L Zhang, J H Sharp, P D Townsend and A I Ferguson	**281**	Waveguide properties of He^+-implanted chromium doped laser materials
C J Sofield, S Sugden, J Ing, L B Bridwell and Y Q Wang	**285**	Ion beam modification of polymers
A Kolitsch, E Hentschel and E Richter	**291**	Wear reduction by ion implantation-assisted deposition
R A Swady, H A Ja'fer and R P Howson	**297**	The reactive sputtering of thin films of TiN at low target voltages
G Carter, M J Nobes and I V Katardjiev	**303**	The theory of ion beam polishing and machining
R Smith, D J O'Connor and E I von-Nagy Felsobuki	**311**	Trapping mechanisms in scattering of beams at grazing incidence from crystals
M Jaraiz, J Arias, L A Bailón and J J Barbolla	**321**	Detailed computer simulation of damage accumulation in ion irradiated crystalline targets
I R Chakarov and R P Webb	**325**	The effect of beam divergence on single crystal implant profiles

R Badheka, J A Van den Berg, D G Armour and M Wadsworth	**331**	Theoretical calculations of the broadening of dilute Si, Al and Be doped δ layers in GaAs during SIMS depth profiling
M M Jakas	**337**	Computer simulation of growth during molecular-beam epitaxy of metal-on-metal surfaces
H Bergsåker, F Lama, R Smith and R Webb	**341**	A comparison of TRIM and molecular dynamics in calculating the backscattering yield of carbon incident on graphite
P D Prewett	**345**	Focused ion beams—microfabrication methods and applications (Invited)
R J Young	**353**	Micro-machining using a focused ion beam
J Ishikawa, Y Gotoh, N Fukayama, Y Ogata, K Yoshida and H Tsuji	**357**	Profiles of ion beams extracted from impregnated-electrode-type liquid-metal ion source with linear array emission points
B Khamsehpour and S T Davies	**361**	Drilling of fine apertures in thin metallic foils using a focused ion beam
A Markwitz, H Baumann, E F Krimmel, M Rose, K Bethge, P Misaelides and S Logothetidis	**367**	Nitrogen profiles of thin sputtered PVD silicon nitride films
G Angel and Weilin Tu	**371**	Monitoring implant induced gate oxide stress potentials
Montaz Ali and R Smith	**377**	The structure of small clusters ejected by ion bombardment of solids
H A Ja'fer and R P Howson	**381**	A low-voltage, high-current, ion-bombardment source using magnetron principles
A S Way	**385**	Quartz resonator techniques for simultaneous measurement of areal mass density, lateral stress, and temperature in thin films
A E Waddilove, A Chew and D E Sykes	**389**	The effect of oxygen flooding on the secondary ion yields of matrix and impurity species in InP and InGaAs

Selected Proceedings of the
12th INTERNATIONAL VACUUM CONGRESS (IVC-12)
8th INTERNATIONAL CONFERENCE ON SOLID SURFACES (ICSS-8)
Vacuum Science division
12–16 October 1992, The Hague, The Netherlands

AUTHORS		ARTICLES
A W Kleyn	**417**	Foreword
Vacuum Physics and Materials **M Jäckel and F Fietzke**	**421**	Investigations into sorption kinetics of porous solids at low temperatures and under vacuum conditions

M Suemitsu, Y Uneme and N Miyamoto	**425**	Development of extremely high vacuums with mirror-polished Al-alloy chambers
T Fujimoto, T Ni-imi, K Shobatake and K Kondo	**429**	A scattering experiment of molecular beams for estimation of the adsorption probability
Yao-En (David) Li, J Rizos, D Vassallo and M Giacobbe	**433**	The behavior of moisture in high pressure inert cylinder gases
Y C Liu, J R Huang, C Y Wu and J R Chen	**435**	Thermal outgassing study on aluminum surfaces
L Koller, M Jenko, B Praček and S Spruk	**439**	Outgassing characteristics of Au electroplated Palladec 21 for use in hermetical encapsulated electronic parts
N Matuda, Y Saito, Y Ogawa, K Akaishi and G Horikoshi	**443**	Reduction of outgassing rate of SUS316 and OFC class-1 by prebaking in a vacuum furnace: application to gravitational-wave experiments
Y Tuzi, Y Kurokawa and K Takeuchi	**447**	Effect of bake-out on the adsorption kinetics of gases in a vacuum chamber
P J Szwemin, M Kaczanowski and and M Niewiński	**451**	New program for calculating the conductance of composite vacuum system using the Monte Carlo method
R A Douglas	**455**	Flow of rarefied gases in non-isothermal systems
F Brecelj, M Mozetič, K Zupan and M Drobnič	**459**	Behavior of catalytic probes at low pressure
S Spruk, M Jenko, L Koller and D Railič	**461**	Vacuum tight laser welds for hermetical incapsulation of electronic parts
Y Ogawa, S Michizono, Y Saito and G Horikoshi	**465**	Double-balanced bellows for vibration isolation between the inside and outside of a vacuum; application to gravitational-wave experiments
Y A Deulin, V P Michailov and A V Usov	**469**	New type of clean precise high vacuum drive, based on magnetic and dielectric liquids rheology

Accelerators

R J Reid	**473**	The attainment of uhv in synchrotron light sources—a review
A G Mathewson	**479**	Vacuum problems in particle accelerators due to interaction of synchrotron radiation, electrons and ions with surfaces
J R J Bennett, R J Elsey and T P Parry	**485**	The performance of the vacuum system of the 800 MeV proton synchrotron, ISIS
C L Foerster, H Halama, G Korn, M Calderon and W Barletta	**489**	Desorption measurements of copper and copper alloys for PEP-II
M Kobayashi and Y Hori	**493**	Evacuation characteristics under photon irradiation
L Bagge, H Danared, K Ehrnstén, C J Herrlander, J Hilke, A Nilsson and K-G Rensfelt	**497**	The ultra high vacuum system of CRYRING
L Westerberg, P Jahnke, L Hermansson and D Reistad	**501**	Further development of the CELSIUS uhv system
C Benvenuti, J P Bojon, P Chiggiato and G Losch	**507**	Ultimate pressures of the large electron positron collider (LEP) vacuum system
C Benvenuti and P Chiggiato	**511**	Obtention of pressures in the 10^{-14} torr range by means of a Zr–V–Fe non evaporable getter
J Montuclard, M Lefrancois and Ch Rouaud	**515**	What joining method for the new generation of accelerators (SSC and LHC)
Vijendran Rao	**519**	Experiences with titanium sublimation pumps for uhv/accelerator application
H A Sakaue, Y Hirano, S R In, S Yokouchi, K Watanabe and S H Be	**523**	Lumped NEG pump for crotch and pumping system of SPring-8 storage ring

J Gabusi, J Geller, H C Hseuh, M Mapes and P Stattel	**527**	Pressure measurements in the AGS Booster ultra-high vacuum system
Y Hori, M Kobayashi, M Matsumoto and T Kobari	**531**	Photodesorption and photoelectron yields at normal and grazing incidence
Y Saito, K Kakihara and G Horikoshi	**535**	Pressure distribution analysis of the KEK 2.5-GeV linac
K Chida, Y Arakaki, T Tanabe, M Tomizawa, M Yoshizawa, J Yoshizawa, I Katayama, H J Xu and A Mizobuchi	**539**	Present status of TARN-II vacuum system
J R Chen and Y C Liu	**545**	The straight vacuum chambers of the SRRC 1.3 GeV electron storage ring
M Tosa, A Itakura and K Yoshihara	**549**	Extremely high vacuum system for long-distance transport

Pressure Measurement

Y H Kuo and T Kanaji	**555**	Measurement of uhv and xhv by hot cathode ionization gauge with higher sensitivity
P A Redhead	**559**	Uhv and xhv pressure measurements
Y Hirohata, S Fujimoto, T Hino, T Yamashina, T Kikuchi and S Ohsako	**565**	Application of flash desorption spectroscopy to pressure measurement in extremely high vacuum
K Jousten and G Rupschus	**569**	The uncertainties of calibration pressures at PTB
A Calcatelli, M Bergoglio and G Rumiano	**573**	Primary and secondary vacuum measurements
J Setina and J P Looney	**577**	Behavior of commercial spinning rotor gages in the transition regime
T Kanaji, T Urano and S Hongo	**581**	Experimental results of cascade static lens gauge
A D Chew, A Chambers and A P Troup	**583**	The gas species dependence of the performance of a rotating disc absolute pressure gauge in high vacuum
E Ueda, Y Hirohata, T Hino and T Yamashina	**587**	Lower limit of pressure measurement using a spinning rotor gauge
K Mukugi, H Tsuchidate and N Oishi	**591**	Characteristics of cold cathode gauges for outgassing measurements in uhv range
C Oshima, T Satoh and A Otuka	**595**	An ionization gauge with a cold electron source for an extremely high vacuum
S Inaba, K Akaishi, T Mori and K Hane	**599**	Photothermal vibration for a cantilever placed near a planar wall in low-vacuum region
A Ooiwa and M Ueki	**603**	Development of novel air piston gauge for medium vacuum and fine differential pressure measurement
W Jitschin and M Ruschitzka	**607**	Metrological properties of the thermal conductivity gauge
T Kanaji, M Yano, T Urano, S Hongo, C D Suen and J Z Chen	**611**	Characteristics of an improved axial emission gauge
T Kobayashi, H Hojo and M Ono	**613**	Pressure measurement from 1 atm to 0.01 Pa using a quartz oscillator
G Horikoshi, T Kuroda and Y Oka	**617**	Pressure distribution in a large vacuum chamber with a large gas load and a large pumping speed

Mass Spectrometry

N Müller	**623**	Use of quadrupole mass spectrometers in ultrahigh vacuum systems
W Große Bley	**627**	Helium leak detectors: from a laboratory device to dedicated industrial leak test units
G B Bunyard	**633**	Accurate mass spectrometry at pressures of 10^{5} to 10^{-9} Pa

J H Batey	**639**	Fractionation in gas inlets for PPA calibration
R Pearce, T Winkel, S Ferrari and L Garuti	**643**	Operational experience with a remote radiation hard quadrupole residual gas analyser
J R J Bennett and R J Elsey	**647**	Anomalies in the measurement of the residual gases in a large uhv system using a quadrupole mass analyser
Cs Trajber, M Simon, S Bohátka and I Futó	**653**	A mass independent pre-filter arrangement for quadrupole mass spectrometer
K Kokubun, S Ichimura, H Shimizu and S Sekine	**657**	Pressure measurement method using laser ionization for xhv
N Ogiwara, M Shiho and Y Ueda	**661**	A mass filter with a cold cathode
M E Buckley	**665**	Process control in the semiconductor manufacturing environment using a high pressure quadrupole mass spectrometer
S Bohátka, I Futó, I Gál, J Gál, G Langer, J Molnár, A Paál, G Pintér, M Simon, J Szádai, G Székely and J Szilágyi	**669**	Quadrupole mass spectrometer system for fermentation monitoring

---

Vacuum Pumps

H Yamakawa	**675**	Development and performance of bakeable cryopumps for extreme high vacuum
A Conrad and O Ganschow	**681**	Comparison of Holweck- and Gaede-pumping stages
M Ota and H Taniguchi	**685**	Transmission probabilities of gas molecules through finite length tubes in transition ranges
T Sawada	**689**	Improvement in the performance of spiral grooved visco-vacuum pumps in the coarse vacuum region
G Kiese, H-J Mundinger and G Voss	**693**	Increasing uptime of cryopumps with fast intelligent regeneration system technology
J W Lee, Y K Lee and H O Choi	**697**	Change of pumping speed with time for cryosorption array
L Mathieu and J M Gruffat	**701**	Efficient anti-corrosive protection for turbomolecular pumps, the inverted dynamic seal eliminates the purge gas line connection
N Yagi, H Aihara, H Yamamoto, K Tsukui and I Ohdomari	**705**	An all metal extremely high vacuum cryopump
R Bahnen and M Kuhn	**709**	Increased reliability of drypumps due to process related adaptation and prefailure warning
K Odaka and S Ueda	**713**	A new activation method for titanium sublimation pumps and its application to extremely high vacuums
C Juhnke, H H Klein, S Schreck, U Timm, H U Häfner, M Mattern-Klosson and H-J Mundinger	**717**	The crossover of refrigerator-cooled cryopumps
K-H Bernhardt, M Mädler and O Ganschow	**721**	Influence of shock and vibration on a magnetically levitated pump
Shi Liqun and Yang Naiheng	**725**	A new method for calculating the pumping performance of turbomolecular pumps using the Oatley equation
S Yagyu, I Fujishima and M Miki	**729**	Fundamental test and design of turbomolecular pump with water trap using high T_c superconductor magnetic bearing
G Gasparini, B Ferrario and S Raimondi	**733**	Water vapour sorption characteristics of a non-evaporable getter pump
N I Spasskova and S I Ukolov	**737**	Hydrogen sorption by nonevaporable getters based on Ti and Zr
A K Rebrov	**741**	New principles of improvements of diffusion pumps

N V Iliasova, S V Nedosekova, A K Rebrov, P A Skovorodko and J J Roig	**745**	Computational optimization of diffusion pump parameters
N M Bulgakova, G A Khramov, O A Nerushev and A K Rebrov	**749**	Study of a diffusion pump ejector
A Pregelj, M Pribošek, M Mozetič, M Drab and A Paulin	**753**	Influence of elastomer gasket deformation on characteristics of piston pumps
N Kawada, S Morii and J Yamada	**757**	An attempt at development of a magnetic levitation transport system in vacuum using the mechanism of induced repulsive force
